

500+ Best ChatGPT Prompts for All Purposes 2024

Jane Cao

Updated December 22, 2023

Tired of spending hours crafting effective chatGPT prompts from scratch?

Spending more time wrestling with your AI assistant than actually getting work done?

We hear you. But fear not!

We've got the ultimate remedy for you: ChatGPT prompt templates.

Our 500+ premade templates are the time-saving, productivity-boosting secret sauce you've longed for.

This collection is a curated treasure trove, meticulously tailored to diverse industries and use cases. And each template has been battle-tested and refined, ensuring top-notch responses.

Ready to say goodbye to frustration and hello to ChatGPT prompt perfection? Let's go!

Tip: This article is lengthy. To quickly find the perfect ChatGPT prompt for your needs, please use the table of contents.

Infographic: 5 Common Issues While Using ChatGPT & Easy Fixes

5 COMMON ISSUES

While Using ChatGPT + Easy Fixes

#1 – ChatGPT stops suddenly

While using ChatGPT, you might experience incomplete responses when ChatGPT suddenly stops generating a response in the middle of a sentence/code.

Reasons:

- ChatGPT has reached its character limit for your account type.
- ChatGPT has run into a bug.
- ChatGPT goes down, or your internet goes down.

Solution:

- Click the "Regenerate response" button.
- Use the short prompt:
+"go on"
+"finish your answer"
+"continue from the last line"
+"continue"

#2 – Inappropriate responses

ChatGPT can occasionally produce inappropriate responses and even go as far as arguing completely incorrect facts.

Reasons:

ChatGPT doesn't use the internet to locate answers. It generates a response by making a series of guesses.

Solution:

- Not entirely believe everything ChatGPT says.
- Double-check the information in ChatGPT's responses for accuracy.

#3 – Limited knowledge

Specifically, ChatGPT has limited knowledge of world events after September 2021.

Solution:

Provide ChatGPT with information about a world event after September 2021 in text format or through links.

#4 – Overly verbose or lengthy responses

ChatGPT might generate excessively long or wordy responses, making it difficult to extract the desired information efficiently.

Solution:

Specify in the prompt the desired response length or ask ChatGPT to provide concise and to-the-point answers.

#5 – ChatGPT's responses don't satisfy your query

Issue	Solution
ChatGPT generates vague or general responses.	Refine and provide more specific prompts.
You want to see alternative perspectives on a topic.	Ask ChatGPT to rephrase its answer in a different way
You want further information.	Provide follow-up questions about it.

How to write ChatGPT prompts effectively to get the best result?

It's not that hard to write effective ChatGPT prompts and achieve outstanding results.

The secret is providing clear instructions and context to guide the model's response. Here are 12 tips to help you get the best results:

1. Be specific

Clearly state what you want from the model, and don't beat around the bush!

Instead of throwing a general question like "Tell me about dogs," provide specific instructions like "Describe the characteristics of Golden Retrievers."

2. Set the format

Like a skilled sculptor, mold the desired format of the response.

For example, if you're yearning for a neat list of goodies, lay it out explicitly in the prompt, such as "List five benefits of regular exercise."

3. Provide context

Give the model some background information to work with.

If you're discussing a particular topic, provide relevant details or mention any specific aspect you want the model to focus on.

For example, if you're discussing climate change, you could start with, "In recent years, the effects of climate change have become increasingly apparent. Discuss the impact of rising global temperatures on biodiversity."

4. Use system messages

Ahoy, system messages! These invaluable instructions steer the model's behavior toward greatness.

Precede your ChatGPT prompt with a system message enclosed within square brackets ([]), like a captain navigating the seas. Evoke the desired context and beckon the model towards the task at hand.

For instance, “[Translate the following English text to French:]” or “[Solve the following math problem:]”. This can help the model understand the context and approach the task accordingly.

5. Control output length

If you want a specific length for the response, mention it explicitly.

For example, you can add, “In no more than 3 sentences, explain the concept of quantum entanglement.”

6. Utilize examples

Providing examples of the desired output can help ChatGPT understand your expectations.

You can include sample responses or indicate the style you’re looking for. However, avoid using the same example repeatedly, as the model may simply copy it.

7. Ask for pros and cons

If you want a balanced response or an evaluation of a topic, ask for both pros and cons.

For instance, instead of asking, “What are the advantages of renewable energy?” you can ask, “Discuss the advantages and disadvantages of adopting renewable energy sources.”

8. Avoid excessive context

While providing context is important, be mindful of overwhelming the model with unnecessary details. Stick to the relevant information that directly relates to the prompt’s objective.

Let’s take some examples.

Wrong prompt: “In the 19th century, James Naismith invented basketball. It was played with a soccer ball and peach baskets. The game evolved over time, and now it’s popular worldwide. Describe the history of basketball and its global impact.”

Right prompt: “ChatGPT, tell me about the fascinating history of basketball and its impact on the world today.”

9. Consider tone and style

If you have a specific tone or style in mind for the response, you can mention it in the prompt. For example,

if you want a humorous response, you can state, “Provide a funny anecdote about cats.”

10. Ask for explanations

Want ChatGPT to explain its reasoning or provide more in-depth responses?

Then, you should explicitly ask for explanations or justifications.

For instance, you can request, “Explain the impact of deforestation on the ecosystem in detail.” or “Provide a comprehensive explanation of photosynthesis in plants, highlighting the role of chlorophyll and the conversion of light energy into chemical energy.”

11. Guide the thought process

If you want the model to think step-by-step or consider different aspects of a problem, you can instruct it accordingly.

For example, instead of this: “[Propose a solution for the rectangular garden fence problem:] What’s the length of the fence required for the garden?”

Use this:

“[Think step by step and propose a solution:] You have a rectangular garden with dimensions 10 meters by 6 meters. Determine the length of fencing material needed, considering any necessary gates.”

12. Iterate and experiment

Oh, the initial output fails to meet your expectations? Don't hesitate to iterate and refine your prompts.

Experiment with different verbiage, rephrasing, or restructuring of instructions until you attain your desired outcome.

500+ Awesome ChatGPT Prompts for Specific Industries and Purposes

I. Best ChatGPT prompts for business

Did you know that ChatGPT can be used to complete many different business-related tasks? For example, ChatGPT can help business owners draft emails, find new business ideas, generate brand names, and more.

Below are business prompts for specific needs.

A. Best ChatGPT prompts for business ideas

1. Find target customers

Identify the primary customers in the <your target niche> market and their demographics.

Your task is to identify the key questions you should ask potential buyers to uncover their pain points and priorities and determine whether they are a sales-qualified lead for your product. The questions should be open-ended, focused on the buyer's needs and objectives, and designed to reveal key information that can help you tailor your pitch and close more sales.

5. Write a sales pitch

Craft a compelling sales pitch that effectively communicates the benefits of <your product> to <your potential customers>. The pitch should be tailored to <your target market>, use language that resonates with <your audience>, and highlight <the unique value proposition of your product>.

I asked ChatGPT to craft a sales pitch and look at what it generated 😬

Craft a compelling sales pitch that effectively communicates the benefits of "SmartFit Gym App" to health-conscious individuals who lead busy lifestyles. The pitch should be tailored to urban professionals seeking convenience and use language that resonates with their desire for efficiency and effective fitness solutions. Highlight the unique value proposition of the SmartFit Gym App, which offers personalized workout plans, virtual trainers, and real-time progress tracking to help them achieve their fitness goals on their terms.

[Opening]

Attention, health-conscious urban professionals! Are you tired of struggling to find time for fitness in your busy schedules? Imagine a solution that brings personalized workouts, virtual trainers, and real-time progress tracking right to your fingertips. Introducing the SmartFit Gym App – your ultimate fitness companion designed for individuals like you who demand convenience and effective solutions.

[Establish the Problem]

We understand that your demanding lifestyle leaves little room for lengthy gym sessions and complicated fitness routines. Balancing work, personal life, and self-care can be a challenge. But fret not! SmartFit Gym App is here to revolutionize your fitness journey, ensuring you never compromise on your health and well-being.

[Unique Value Proposition]

What sets SmartFit apart from other fitness apps is its tailored approach to your specific needs. Our app offers personalized workout plans that adapt to your goals, preferences, and schedule. Whether you're aiming for weight loss, strength building, or overall wellness, SmartFit has got you covered.

[Efficiency and Convenience]

Time is precious, and we know it. With SmartFit, you can say goodbye to lengthy commutes to the gym or waiting for equipment. Our app brings the gym experience to your living room, office, or wherever you are. No more wasted time or energy – just efficient and effective workouts tailored to fit your busy lifestyle.

[Virtual Trainers]

Need motivation and guidance? SmartFit features a team of virtual trainers who will be your personal fitness experts. They'll provide real-time coaching, demonstrating exercises, and offering tips to ensure you maintain proper form and maximize your results. You'll feel like you have a dedicated trainer right by your side, no matter where you are.

[Real-Time Progress Tracking]

We understand the importance of tracking your progress to stay motivated and achieve your fitness goals. SmartFit Gym App provides real-time tracking of your workouts, allowing you to see your improvements and milestones along the way. Celebrate your successes and stay motivated as you witness your transformation unfold.

[Conclusion]

So, why compromise on your health and fitness when you can have it all? SmartFit Gym App is the ultimate solution for busy urban professionals like you who refuse to settle for less. Enjoy the convenience, efficiency, and effectiveness of personalized workouts, virtual trainers, and real-time progress tracking – all within the palm of your hand.

[Call to Action]

Join the SmartFit community today and unlock a world of fitness possibilities tailored to your lifestyle. Download the app now and take the first step towards achieving your fitness goals on your own terms. Remember, your health is your wealth, and SmartFit is here to help you make it a priority without sacrificing your valuable time.

6. Market your product

I want you to act as a salesperson. Your goal is to persuade potential customers <include details about your potential customers> to buy your product <describe your product>. tolerance, investment time horizon, and current tax situation>.

V. Best ChatGPT prompts for Career & Recruiting

A. Best ChatGPT prompts for resume

1. Identify the most relevant skills and experiences

Please provide me with tips and best practices for writing an effective one-page resume that stands out to employers in <your field>.

2. Suggest effective resume formats and designs

I'll provide you with the job description of the industry I'm targeting, as well as my current resume. Your task is to tailor my resume to the job by highlighting my relevant skills and experiences. Here is all the relevant information: <details on the job description, industry, and your current resume>.

3. How to tailor a resume for a specific job or company

Please help me review my current resume and provide feedback on its format, content, and structure. <provide details on your resume, plus the job or industry you are targeting>

4. Recommend action verbs and descriptive language.

Please help me identify and eliminate any unnecessary or irrelevant information on my resume that may distract from my qualifications. Here is my resume: <your resume>

5. Common mistakes on resumes to avoid

What are common mistakes that job seekers make on their resumes when applying for positions in the [industry/field]?

B. Best ChatGPT prompts for cover letter

1. How to write a cover letter

Please provide me with some guidance on how to structure my cover letter to make it stand out and grab the reader's attention. Here is my cover letter: “<your cover letter>”. Here is the job description I'm targeting: “<job description>”. The reader is <details about the reader>.

2. Help with highlighting your skills and experiences for the job

Please provide feedback on the overall tone and language used in my cover letter, and suggest any changes to make it sound more professional. Here is my cover letter: “<your cover letter>”. Here is the job description I'm targeting: “<job description>”.

3. Identify and address potential red flags in the application

Please suggest ways to incorporate keywords and phrases from the job description I'm targeting into my cover letter to improve my chances of getting hired. Here is my cover letter: “<your cover letter>”. Here is the job description I'm targeting: “<job description>”.

4. Provide feedback on the cover letter

Please provide feedback on my cover letter for <specific job/position/industry>. I'll provide you with my cover letter and the job description I'm targeting. Your task is to review the language, tone, and overall effectiveness of my cover letter and provide suggestions for improvement. Also, please give me tips on how to showcase better my skills and experiences, as well as how to convey my enthusiasm and passion for the role and the company. Here is my cover letter: "<your cover letter>". Here is the job description I'm targeting: "<job description>".

5. Offer suggestions for impactful opening and closing statements

Provide suggestions for impactful opening and closing statements for my cover letter. The job I am applying for is <insert job title>, and I want to ensure that my cover letter stands out to the hiring manager. Please consider my experience and skills, as well as the company culture and values. Here is my cover letter: "<your cover letter>". Here is the job description I'm targeting: "<job description>".

6. Tips for addressing salary expectations

Here is my cover letter: "<your cover letter>".

Here is the job description I'm targeting: "<job description>".

Your task is to provide tips for addressing potential sticking points in my cover letters, such as salary expectations or gaps in my employment history. Specifically, I would like advice on how to address these issues professionally and effectively that will make me stand out as a strong candidate for the position.

C. Best ChatGPT prompts for job search

1. Find target companies or industries

Please help me identify a list of target companies or industries that align with my previous work experience, skills, and industry preferences: “Provide relevant data”.

2. How to effectively network with industry professionals and potential employers

Provide me with guidance on effectively networking with professionals and potential employers in <industry>. This may include strategies for identifying relevant networking events or groups, tips for making a positive first impression, and advice on how to follow up and maintain relationships with contacts.

3. Research job openings and company backgrounds

Please give me tips and strategies on researching job openings and company backgrounds, especially where to find job postings and how to research the companies I'm interested in.

D. Best ChatGPT prompts for job interview preparation

1. Brainstorm FAQs by hiring managers

Please list 10 interview questions commonly asked by you, a hiring manager who will interview a candidate for <job position/type of job and the field you're applying for>. The list of questions should be generated based on the provided job description and the candidate's resume. <details of job description and my resume>.

2. Provide insights on a hiring manager when asking a particular interview question

Please provide me with some insights on what a hiring manager may expect to receive when asking <question> when interviewing a candidate for <job position/type of job and the field you're applying for>.

3. Provide tips and strategies for answering a particular interview question.

Please provide me with tips and strategies for answering this interview question “<question>” to increase my chance of getting the job <include details on the job position/type of job and the field you're applying for>. Please also suggest effective ways to structure and organize my responses to ensure they are clear and concise.

4. Give an example answer to a particular interview question

Imagine you're a candidate during a job interview for <include details on the job position/type of job and the field you're applying for>. Your task is to give the best answer to this interview question “<question>” to impress the potential employer and increase your chance of getting the job.

5. Offer guidance on appropriate attire and body language for interviews

Please provide me with tips and guidance on appropriate attire and body language for a job interview <include details on the job position/type of job, the field you're applying for, and the type of company/organization you will be interviewing with>. Also, please advise me on what I should wear to the interview, how I should present myself nonverbally to make a good impression, and any body language mistakes I should avoid during the interview.

6. How to research the company and position for better interview preparation

As a candidate preparing for a job interview <include details on the job position/type of job, the field you're applying for, and the company/organization you will be interviewing with>, how do you research the company and position, including where to start, what to look for, and how to use the information during the interview.

7. How to negotiate salary and benefits if offered the job.

Provide tips and strategies for negotiating salary and benefits if offered <details of the job position, field, and company, plus the initial salary and benefits offered>. Additionally, please guide me on how to research and determine a reasonable salary range and how to approach the negotiation process professionally and effectively.

E. Best ChatGPT prompts for recruiters and HR (Human Resources) professionals

1. Write job descriptions and posting-job ads.

Please generate a job description that is tailored to your company's needs and help attract the most qualified candidates based on the provided industry best practices and data-driven insights. <details on job title and position, Job responsibilities, Qualifications and requirements, Company culture and values, Industry and competition, target audience/candidates>.

2. Brainstorm questions to ask during initial interviews.

Generate interview questions to help a recruiter assess the candidate's qualifications and fit for the job. Ensure the questions are tailored to the job requirements and can cover topics such as the candidate's experience, skills, knowledge, work style, and career goals. Here is relevant information about the job: <details on the job position and the skills and qualifications you're looking for in a candidate>. Here is relevant information about the candidate: <details on the candidate's resume, plus cover letter, portfolio, or work samples>.

3. Guidance on the best practices for conducting virtual or in-person interviews.

Please guide me on the best practices for conducting virtual or in-person interviews, such as establishing a rapport with the candidate, creating a comfortable environment, and avoiding bias.

4. Give recommendations on how to optimize the recruitment process

With the provided recruitment data, please analyze and provide recommendations on how to <details on the areas of the recruitment process to be improved, e.g., improve job postings or better target qualified candidates>.

Here is the recruitment data: “<recruitment data>”

5. Customize a training program

Please customize a training program to address <challenge and opportunity of your recruitment process>, based on the following information: <your current recruitment process, the goals of your recruitment team, and any specific areas where you are looking to improve>

VI. Best ChatGPT prompts for Web Development and Programming

A. Best ChatGPT prompts for coding and web development

1. Provide recommendations on a particular programming language

Suggest which programming languages and frameworks are best suited for a web development project that <details on the project's type, main purpose and requirements, target audience and the user's needs, and other relevant factors>. What languages and frameworks do you recommend, and why?

2. Recommendations on popular frameworks for specific programming languages

Recommend popular frameworks for <programming language> for a web development project that <details on the project's type, the features, and functionality required for, plus your level of experience>. Please provide an

overview of each framework's features, advantages, disadvantages, and best use cases.

3. Provide code examples

Please provide me with code snippets or examples in <programming language> for <specific task or functionality>, and explain how the code works. Please also provide any potential issues or considerations that developers should keep in mind when using this code.

4. Guidance on best practices for coding

Please provide guidance on best practices for coding in <programming language> for <specific task or functionality>, including proper syntax, code structure, and error handling. Please provide examples and code snippets that illustrate these best practices and explain how they work.

5. Troubleshoot issues with code

Identify the possible causes of an error message that coders encountered while running their code, and suggest potential solutions to fix the issue. Here's the error message: <insert error message>.

6. Offer solutions to coding challenges or problems

Analyze my code in <programming language> and help identify <error messages or logs you have encountered, such as syntax errors or logic flaws>. Please provide me with feedback on <desired outcome or functionality that you expect the code to achieve>. Here is my code: <code>.

7. Suggest ways to organize code

Please suggest ways to organize my codebase for better readability, maintainability, and scalability. My code is <your code>, written in <programming language>, and is structured by <function/feature/module>. We are a team of <number of developers> and use <version control software> for managing changes. Our codebase has some long functions and modules, and we want to ensure that our code is consistent and easy to maintain. Please provide some guidance on how we can achieve this.

8. Guide coding standards

Please guide me on coding standards for our development team. We primarily work with <programming language> and use <development framework> for our projects. We want to ensure consistency and readability across our codebase, so we are looking to establish a set of coding standards that includes naming conventions, variable declarations, and code commenting. Are there any industry-standard coding style guides we should consider?

How can we ensure our coding standards are easy to follow and enforce?

9. Identify potential security vulnerabilities and suggest best practices for securing the application

What are some potential security vulnerabilities that web developers should be aware of when developing a <type of web application>, and what are some best practices for securing the application? Please guide me on <programming languages and frameworks> and any third-party libraries or APIs being used.

10. Suggestions to optimize code for better performance

Please guide me on optimizing code for <desired output for the code, e.g., reducing page load times>. Please provide specific suggestions for <programming language/framework> based on the following information: <type of web application, current performance issues, and any constraints or limitations>. Also, please explain the potential impact of each suggestion and any trade-offs that developers should consider when implementing them.

B. Best ChatGPT prompts for web design

1. Guide design principles and best practices for web design

What are some key design principles and best practices that web designers should keep in mind when creating a website <include details on the type of your website, your design goals, target audience, and design preferences>? Please provide examples of effective design elements and explain how they contribute to a positive user experience. Also, please suggest some common pitfalls or mistakes designers should avoid when designing a website.

2. Suggest tools and resources for web design

Suggest some tools and resources that <level of experience> web designers can use to create and optimize their designs <include details on the target audience, budget, and goals for the website>. The suggested tools and resources should feature <desired features and functionalities>.

3. Offer feedback and critiques on existing designs

Provide feedback and critiques on my existing website design. The website is for a <type of website>, and the design goals are to <state design goals>. The target audience is <describe target audience>, and the website functionality includes <describe website functionality>. I would appreciate your feedback on the design elements

used, as well as suggestions for improving usability, aesthetics, consistency, performance, and accessibility.

4. Identify and solve design problems and challenges

I'm having trouble with the design of my website <describe the specific issue or challenge>. Help me identify the problem and suggest potential solutions. What information would you need from me to better understand the issue?

C. Best ChatGPT prompts for Javascript

1. Guidance on syntax and coding conventions

What are some recommended syntax and coding conventions that JavaScript programmers should follow when writing code <include details on the specific task or functionality you are trying to achieve>? Provide examples of best practices for code readability, maintainability, and performance optimization.

2. Debug and troubleshoot errors in JavaScript code

I'm experiencing some errors with my JavaScript code, and I'm unsure how to troubleshoot and fix them. Help me identify the problem and suggest a solution. <Please provide the specific error message(s) you're seeing, the relevant section(s) of your code, and any steps you've already taken to try to solve the issue>.

3. Suggestions for developing and implementing algorithms and data structures

I am working on a JavaScript project, and I need you to help me develop an efficient algorithm to solve a specific problem. The problem involves <provide a brief description of the problem>. Currently, I am using <describe your current approach to solving the problem>. Please provide any suggestions for a more efficient algorithm or data structure that could be used. Also, Explain how the suggested solution would improve the performance of my code.

4. Identify the best approach to manipulate the Document Object Model (DOM)

I'm a JavaScript programmer working on a web application that involves manipulating the DOM. I'm having trouble with <insert specific task>, and I'm not sure where to start. Help me understand the best approach to accomplish this task. Here's my current code: <insert code snippet>. My

desired outcome is <insert desired outcome>. Provide suggestions or changes to help me achieve my goal.

5. How to implement event handling and listeners

What are some best practices for implementing event handling and listeners in JavaScript <include details on the types of events you want to handle, the elements involved, and the desired functionality>?

6. Ways to work with APIs and third-party libraries

What is the best way to integrate the <insert specific third-party library or API> into a JavaScript project? I am facing an issue where <insert issue/problem faced>, and I'm not sure how to proceed. Any tips or suggestions for troubleshooting and resolving this issue would be greatly appreciated.

7. Ways to implement client-side validation and form submission

What are some best practices and techniques for implementing client-side validation and form submission in JavaScript <please include information on the form fields, desired validation rules, and submission behavior, such as whether to submit the form via AJAX or a standard HTTP request>?

8. Best practices for creating and managing cookies

What are some best practices for creating and managing cookies in JavaScript <include details on the type of cookies you want to create and manage, their purpose, and any specific requirements or constraints that need to be considered>?

9. Best practices for managing asynchronous operations with callbacks, promises, and async/await

What are some best practices for managing asynchronous operations in JavaScript using callbacks, promises, and async/await <include details on the task or process you're trying to perform asynchronously, plus the asynchronous mechanism you're currently using or planning to use>? Please provide examples of each method and explain their advantages and disadvantages.

10. Best practices for implementing security measures

What are some best practices for implementing <type of security measures> for a web application <details on the nature of your web application>?

D. Best ChatGPT prompts for software engineers

1. Best practices for designing software architecture

What are some best practices for designing the software architecture? <include details about the project's scope, goals, constraints, and requirements, plus the current state of the project, such as the software or systems that need to be integrated or replaced and the technologies and tools being used>

2. Best practices for writing clean, efficient, and maintainable code

What are some best practices for writing clean, efficient, and maintainable code in <insert programming language here> given the project requirements of <insert project requirements here>? Please provide tips on optimizing performance and minimizing technical debt, as well as suggestions for maintaining code quality and readability over time.

3. How to troubleshoot and debug an issue

What steps should be taken to troubleshoot and debug an issue where <details on the problem and the environment in which it occurred>? Please include details on what information to gather, tools to use, and best practices for identifying and resolving the issue.

4. Create and implement software testing strategies

What are some effective software testing strategies <include details on the type of software, the intended audience, the development platform, and any specific requirements for testing>? The team is <your team's existing testing practices>. What are some recommended tools and best practices for testing this type of web application?

5. Best practices for optimizing software performance

What are some strategies and best practices for optimizing the performance of <details on the programming language and environment used, the performance issues encountered, the hardware and infrastructure used, and the intended workload and usage patterns of the software>?

6. Guidance on common conventions and standards used in software development

What are some best practices and industry standards for web application development <include information on the technology stack, programming language, and frameworks>.

E. Best ChatGPT prompts for machine learning

1. Explain complex concepts

Explain the difference between <names of two fundamental concepts> in machine learning. Please provide examples of when each approach might be used, and discuss the advantages and disadvantages of each approach.

2. Recommendations on machine learning algorithms and techniques

What machine learning algorithm or technique would be appropriate for my task of <describe the task you are trying to accomplish> given my data characteristics of <describe the size, type, and quality of your data> and my performance requirements of <describe your desired level of accuracy, speed, and scalability>?

3. Guidance on data preparation and cleaning techniques to improve the quality of input data

I have a dataset of <data type>, consisting of <number of samples> samples and <number of features> features. The data has <known issues or inconsistencies>. My end goal is to <machine learning task>, and the performance metric I care about the most is <performance metric>. What are some data preparation and cleaning techniques I can use to improve the quality of the input data?

4. Guidance on implementing a machine learning model in a programming language

I'm working on implementing a machine learning model in <desired programming language>. Please provide me with guidance on how to do this. I'm specifically interested in <insert specific tasks, such as classification, regression, or clustering> using <insert name of the dataset>. I have some programming experience, but I'm unsure where to start with machine learning.

5. Analyze machine learning results and suggest actions based on the findings

I have trained a machine learning model using <algorithm or approach> on a <size> dataset of <format> data for the task of <specific task or problem>. The model has achieved a <performance metric> score of <score>. However, I have difficulty interpreting the results and deciding on the next steps. Help me with analyzing the results and suggesting actions based on them.

VII. Best ChatGPT prompts for Technology

A. Best ChatGPT prompts for UX design

1. Guidance on a specific question or problem related to user research or usability testing

I'm having trouble <particular question or problem related to user research or usability testing>. Suggest some effective strategies for this question/problem. I've already tried <specific strategies you have used>, but with little success.

2. Create user personas

We are designing <details on the product or service being designed, its purpose, niche>. Please create two user personas based on our target audience: <details on target users, their demographics, their behaviors, preferences, pain points, and motivations related to the product or service>.

3. Create user flows

Create a user flow for <specific task or user goal> in <product or feature name>. The user flow should outline the steps a user would take to complete the task or

achieve the goal and should take into account any potential roadblocks or decision points. What information or insights do you need from me to create an effective user flow?

4. Detailed guidance on how to design wireframes and prototypes for a specific project

Please help me design wireframes and prototypes for my project <provide details on your project, including the purpose of the interface you're designing, your target audience, desired features, etc.>

5. Provide guidance and examples based on established best practices in user experience design

Hi ChatGPT, I'm a UX designer working on developing UI design principles and style guides for a new project. Please provide guidance and examples based on established best practices in user experience design. Here's some specific information about the project:

- Brand guidelines: <insert brand guidelines>
- User research findings: <insert user research findings>
- User personas: <insert user personas>
- User needs: <insert user needs>

Based on this information, could you please provide me with some guidance on the following:

1. Key UI design principles that we should consider for this project
2. Examples of effective UI design styles for similar projects
3. Tips for developing a comprehensive UI style guide that is easy to use and maintain.

6. Suggest the most suitable interface and features to enhance user experience of a website

Using your knowledge of UX/UI design principles, website development tools, coding language, etc., your task is to suggest a suitable interface and features that can improve my website's user experience while also aligning with my business goals. Here is some helpful information: <provide a brief overview of your website, your company's business goals, and your target audience>.

C. Best ChatGPT prompts for Python

1. Explain how to use Python syntax and language features

I'm <describe your level of familiarity with Python>, and have trouble understanding <your specific areas of confusion>. Explain to me: <list of questions related to the areas of confusion>

2. Suggest development environments and tools for Python

I'm starting a new project in Python, and I'm not sure which development environment or tools to use. Could you please recommend some options based on my needs and preferences? Here's some specific information: <details on your project type, operating system, your level of experience, and desired features/requirements>. Based on this information, could you please recommend:

1. A development environment that would be suitable for my needs
2. Any specific tools or plugins that would be useful for my project
3. Any other tips or resources that could help me with Python development

3. Recommend libraries and frameworks for various tasks in Python

I'm working on a project in Python, and I need to find a library or framework that can help me with a specific task. Could you please recommend some options based on my needs and preferences? Here's some specific information: <details on the task, operating system, your Python experience, and specific features/requirements>. Based on this information, could you please recommend:

1. Any libraries or frameworks that would be suitable for my needs
2. Any specific features or benefits of each recommended option
3. Any other tips or resources that could help me with using the recommended libraries or frameworks

4. Data analysis and visualization in Python using libraries

I'm working on a data analysis and visualization project in Python using <the specific library you want to use>, and I could use some guidance. Here's some specific

information: <details on the data type you're working with, the specific analysis or visualization you want to perform, and any specific requirements or preferences you have>. Based on this information, could you please provide:

1. Guidance on how to perform the analysis or visualization task using Matplotlib or Seaborn
2. Best practices for data analysis and visualization using these tools
3. Any other tips or advice that could help me with this project

5. Assistance with machine learning and artificial intelligence tasks in Python

I'm working on a machine learning or artificial intelligence task in Python using <specific libraries you want to use>, and I could use some guidance. Here's some specific information: <task, type of data, and any specific requirements or preferences you have>. Based on this information, could you please provide:

1. Guidance on how to perform the task using the appropriate libraries
2. Best practices for data preparation, model selection, and evaluation
3. Any other tips or advice that could help me with this project

D. Best ChatGPT prompts for Data Science

1. Clean and preprocess your dataset

I have a dataset that I need help with cleaning and preprocessing for my data science project. The dataset contains <describe what the dataset is about>. Please help me identify and address any issues, such as missing values, inconsistencies, outliers, or any other data quality problems. Could you please let me know if this is something you can help me with?

2. Get a better understanding of a dataset's distribution and relationships between features

I'm working on a data science project, and I need help understanding the distribution and relationships between the features in my dataset. The dataset contains <describe what the dataset is about>. I would appreciate your assistance in visualizing the distribution of each feature, identifying any outliers, and exploring potential relationships between the features. Help me with this task.

3. Visualize your dataset to communicate insights effectively

Your task is to visualize my dataset to communicate insights effectively. Here is information about my dataset: <your dataset's name, format, scale, background information, your target audience, plus variables and type of data in your dataset>.

4. Feature selection and dimensionality reduction

I'm working on a data science project, and I have a large dataset with many variables. I need help selecting the most relevant features and reducing the dimensionality of my dataset. The dataset contains <describe what the dataset is about>. Please identify the most important features and perform dimensionality reduction techniques such as Principal Component Analysis (PCA) or t-distributed Stochastic Neighbor Embedding (t-SNE).

5. Model selection and evaluation

I'm working on a data science project, and I need help selecting and evaluating the best machine learning models for my dataset. The dataset contains <describe what the dataset is about>. Identify the most suitable models for my data, train and evaluate them using appropriate metrics, and provide recommendations for improving the model performance.

VIII. Best ChatGPT prompts for Education & Learning

A. Best ChatGPT prompts for teachers and instructional designers

ChatGPT prompts for content creation

1. Suggest resources or materials for teaching <topic> in <subject>.
2. What are effective ways to present <content> to <the audience>?
3. Provide some examples of engaging activities for teaching <topic>.

ChatGPT prompts for learning objectives

4. Develop clear and measurable learning objectives for <course/lesson> on <topic>.
5. How do I align the learning objectives with the overall goals of the course or program?
6. Give me some examples of learning objectives for <topic> in <subject>.

ChatGPT prompts for assessments

7. Create effective assessments to evaluate learners' understanding of <topic>.

8. Give me guidance on how to provide feedback to learners based on their performance on assessments.

9. Suggest some ways to ensure the assessments are aligned with the learning objectives.

Instructional strategies

10. What are some instructional strategies that are effective for teaching <topic> to <audience>?

11. How do I choose the appropriate instructional strategy for a given learning objective?

12. Suggest some ways to make the instruction more engaging and interactive.

Course design

13. Design the course structure and sequence of learning activities for <course/lesson> on <topic>.

14. Give me guidance on how to pace a course to ensure effective and efficient learning.

15. Suggest some ways to make the course more accessible and inclusive.

B. Best ChatGPT prompts for students

ChatGPT prompts for homework help

1. Explain how to solve problem <X> in <subject> homework.

2. Provide an example of <topic> for my <subject> homework.

3. Suggest resources to help me with my <subject> homework.

ChatGPT prompts for language learning

For vocabulary building

1. Provide me with the definition of <word> in <language>.

2. What are some synonyms and antonyms for <word> in <language>?

3. Give me an example sentence using the word <word> in <language>.

For conversation

4. Let's have a conversation in <language>?

5. Give me guidance on how to improve conversational skills in <language>.

6. Give me some phrases to use in <language> conversations.

For comprehension skills

7. Provide me with a reading passage in <language> to practice my comprehension skills.

8. What are some strategies for improving my reading comprehension in <language>?

9. Give me some comprehension questions based on this passage in <language>.

For language learning resources

10. What are some good language learning apps for <language>?

11. Recommend a good textbook/course for learning <language>.

12. What are some tips for self-studying <language>?

For grammar and syntax

13. What is the correct verb form in this sentence in <language>?

14. Explain the difference between <grammatical concept A> and <grammatical concept B> in <language>.

15. How do you form questions in <language>?

ChatGPT prompts for math

1. How do I solve <math problem> in <field of math>?

2. What is the formula for <concept> in <field of math>? Give me only the result of the formula as text, and do not write explanations.

3. I'm having trouble understanding <math concept>. Please explain it to me.
4. What are some strategies for preparing for a math test in <field of math>?
5. Provide one-on-one tutoring in <field of math>.
6. Suggest additional resources or materials to help me with <field of math>.
7. What are some effective study techniques for learning math?
8. How do I use <math tool> to complete my project?
9. How can I prepare for a math competition, including strategies and practice materials?
10. Help me with my college math course, including calculus, linear algebra, and differential equations.

IX. Best ChatGPT prompts for Health and Well-being

A. Best ChatGPT prompts for fitness

1. Offer advice on creating an exercise program

Provide helpful advice on creating an exercise program that suits my fitness level, goals, and schedule. My current fitness level is <describe your current fitness level>, my fitness goals are <describe your fitness goals>, and I have <describe your available time and resources for exercise>. What are some workout recommendations that you have for me?

2. Answer questions related to nutrition and diet

Provide advice on nutrition and diet to help me achieve my fitness goals. My fitness goals are <describe your fitness goals>, my current diet consists of <describe your current diet and eating habits>, and I have <describe your activity level and exercise routine>. I also have <any specific dietary requirements or restrictions, such as food allergies or cultural/religious dietary practices>. What are some dietary recommendations that you have for me?

3. Suggestions on how to modify exercises to accommodate injuries

Provide advice on how to modify my exercise or workout routine to accommodate for my injury/physical limitation. I have <describe your injury or physical limitation>, and I am experiencing pain/discomfort when doing <describe the exercises or workouts causing discomfort>. I have

been recommended by my healthcare professional to <describe any recommended modifications or restrictions>. My fitness goals are <describe your fitness goals>, and my current exercise routine includes <describe your current exercise routine>. What are some suggestions you have for me?

4. Guidance on how to track progress and set realistic goals

Guide me on how to track my progress and set realistic fitness goals. My current fitness level is <describe your current fitness level>, and my fitness goals are <describe your short-term and long-term goals>. I currently use <describe any equipment or tools you use to track progress>, and my preferred method of tracking progress is <describe your preferred method>. I have <describe your available time and schedule for exercise>. What are some recommendations you have for me?

5. Tips on how to maintain motivation and consistency in a fitness routine

Provide tips on how to maintain motivation and consistency in my fitness routine. My current level of motivation is <describe your current level of motivation>, and I am facing challenges with <describe any barriers or challenges>. My fitness goals are <describe your fitness goals>, and my exercise routine includes <describe your

exercise routine and preferred types of exercise>. I have <describe your support system>. I have <any previous experience with maintaining motivation and consistency in a fitness routine>. What are some recommendations you have for me?

6. Provide information on nutrition and diet

Provide information on nutrition and diet and how they relate to achieving my fitness goals. My current dietary habits are <describe your current dietary habits>, and I have <any specific dietary requirements or restrictions>. My fitness goals are <describe your fitness goals and how they relate to nutrition and diet>. I have <any health conditions or medications that may impact my dietary needs>, and my current level of knowledge or experience with nutrition and diet is <describe your current level of knowledge or experience>. What recommendations do you have for me?

7. Tips on proper exercise technique and form

Provide me with tips on proper exercise technique and form for <insert the name of the exercise or movement>. My current level of experience and knowledge with this exercise is <insert your current level of experience and knowledge>. I have <insert any physical limitations or injuries that may affect your ability to perform the exercise>. I have access to <insert any equipment you

have available>. What recommendations do you have for improving my technique?

B. Best ChatGPT prompts for therapy

1. Guidance on coping with mental health issues

I am experiencing symptoms of <anxiety/depression/stress>, and I am looking for guidance on how to cope with these issues. Provide me with some tips and strategies that may be helpful for me.

***Important note:** While ChatGPT can provide helpful information and guidance, its responses should not be considered a substitute for professional therapy from a licensed mental health provider. If you are experiencing mental health concerns, it's important to seek professional help from a qualified therapist or healthcare provider.*

2. Advice on managing and reducing symptoms of various mental health disorders

Provide advice on managing and reducing symptoms of <mental health disorder>. I am currently experiencing

<specific symptoms>, and have tried <previous treatments>. What strategies or techniques can I use to alleviate my symptoms and manage my disorder?

3. Provide support and guidance for individuals going through difficult life transitions

I am currently going through a difficult life transition/ experiencing grief or loss, and I am feeling <specific emotions>. Provide me with advice or guidance on how to cope with this experience and move forward healthily.

4. Tips on self-care and stress management techniques

Provide me with tips and techniques for managing stress and practicing self-care. Specifically, I am dealing with <specific stressor or situation>, and I currently <do/do not> have any self-care practices in place. I aim to <specific goal for improving stress management and developing healthier habits>.

C. Best ChatGPT prompts for medical

1. Provide general information on medical conditions

Provide information on <medical condition>, including symptoms, causes, and treatment options.

2. Explain medical terminology and concepts

Explain the medical term/concept <insert term or concept>.

3. Advice on how to manage and prevent certain medical conditions

Offer advice on how to manage and prevent medical conditions. Specifically, I'm interested in <insert specific medical condition or concern>. What are some steps I can take to manage this condition or prevent it from developing?

4. Clarify instructions or information provided by healthcare professionals

Hi ChatGPT, I recently received instructions or information from my healthcare provider, but I'm unsure I understand everything. Help me clarify <provide details about what you need clarification on>.

5. Suggest questions to ask healthcare providers during appointments

Suggest some questions to ask my healthcare provider during my upcoming appointment. I am seeing <type of healthcare provider> for <reason for visit>, and I would like to be prepared with some helpful questions. Is there any

relevant information about my medical history or background that would inform the types of questions I should ask?

6. List potential diseases based on specific symptoms

List all the possible causes of <describe the symptoms>.

For example:

D. Best ChatGPT prompts for yoga

1. Guidance on teaching yogi beginners

Can you provide a step-by-step guide for teaching beginners yoga classes? Include instructions for basic poses and tips for maintaining proper alignment.

2. Guidance for a specific pose in yoga

Can you provide a step-by-step guide for the 'Downward Facing Dog' pose in yoga, including instructions on proper alignment and breathing?

3. Create personalized sequences that fit specific needs

Suggest a beginner-friendly yoga sequence for a 30-minute class with gentle warm-up exercises, standing poses, and a relaxation period.

4. Tips for creating a welcoming environment in a beginner-level yoga class

Share some tips for creating a welcoming and inclusive environment in a beginner-level yoga class. How can I make sure everyone feels comfortable and supported?

5. Explain a specific concept in yoga

Explain the concept of 'Ujjayi' breathing in yoga and how it can be incorporated into a beginner-level class.

X. Best ChatGPT prompts for Arts and Entertainment

A. Best ChatGPT prompts for music

1. Provide musical arrangement for existing lyrics

Help me create music. Specifically, I need guidance on the overall musical arrangement for the song I've written lyrics for. The lyrics express <emotion/meaning>. I want you to suggest the instrumentation, dynamics, and structure that would suit the lyrics. Consider elements such as verses, choruses, bridges, and any instrumental breaks or solos that could enhance the song.

2. Write song lyrics

Generate powerful and meaningful lyrics for a <theme/mood> song. The lyrics should follow a <structure> structure, including verses, a chorus, and optionally a bridge. The intended style is <music style/artist> to match the genre. Please incorporate the following key phrases or ideas: <key phrases/ideas>. Feel free to add your own

creative touch and personalize the lyrics. The target audience is <audience description>. Please write <number> verses and <number> choruses. The lyrics should evoke <specific emotions/atmosphere>. The length of the song should be around <approximate duration>.

3. Assist with music composition

Compose a piano composition that combines elements of both traditional and modern techniques. The overall musical direction should convey a <mood/atmosphere/emotion>. Incorporate traditional methods such as <specific traditional methods, techniques, or styles> to infuse a sense of <traditional influence>. At the same time, incorporate modern elements such as <specific modern techniques or styles> to bring a contemporary and innovative touch. The composition should follow a <structure/form> and consist of <number of sections>. 4. Find new music to listen to

I'm looking for some new music to listen to. Please recommend some artists or genres that you think I might enjoy. I'm currently into <insert your current favorite artists or genres>, and I prefer <insert any preferences you may have, such as upbeat music or relaxing music>.

5. Guidance and resources to help improve your music skills

Please provide me with helpful guidance and resources to help improve my music skills. I'd like to focus on <specific areas of music, such as playing an instrument, singing, or music theory>.

B. Best ChatGPT prompts for gaming

1. Provide information about different games and their mechanics

Provide me with information about <game name> and its mechanics. I would like to know more about <specific aspect of the game>, such as <specific question(s) you have about the game mechanics>.

2. Offer tips and strategies for playing games more effectively

Provide me tips and strategies for playing <game name> more effectively. I'm having trouble with <specific level or challenge>.

3. Recommend games based on a user's preferences

Recommend some games for me to play. I'm interested in <your preferred genre, platform, and game mechanics>, and I've played <your previous favorite games, plus your preferred difficulty level and budget>.

4. Explain gaming-related terminology and concepts

I'm unfamiliar with <gaming-related terminology or concept>, please provide some information on it.

5. Assist with technical issues or troubleshooting related to gaming

I'm having a problem with <insert game name or platform>. The issue I'm encountering is <describe the issue in detail>. I've already tried <list any steps you've taken so far>. Help me troubleshoot this problem.

C. Best ChatGPT prompts for DND character development

1. Explain the abilities and limitations of character classes

Explain the abilities and limitations of <specific character classes in DND, such as fighters, wizards, and clerics>.

2. Provide information about specific races in DND

What are the unique characteristics and traits of <specific races in DND you are interested in learning about>?

3. Describe spells in DND

Describe <details on spells from a specific class or school of magic and the edition of DND you are interested in>. Please provide a brief explanation of each spell, including its effects, level, school of magic, and any other relevant information.

4. Advice on character backstory, personality, and role-playing in DND

I'm playing a <race> <class> with a <background> background in my DND campaign. I'm struggling to develop a good backstory and personality for my character, and I'm not sure how to role-play them effectively. Offer advice on how to create a compelling character and bring them to life in the game.

5. Recommend items, equipment, and weapons for your DND character

I'm seeking recommendations on items, equipment, and weapons for my DND character <details on your character's race, class, abilities or stats, and other

relevant preferences or playstyle information>. Suggest options based on my character's race, class, and abilities.

D. Best ChatGPT prompts for filmmakers

Best ChatGPT prompts for screenwriting

1. Generate an idea for a screenplay

Develop a concept for a screenplay that targets <specific audience>. Your idea should be original, creative, and engaging and should have the potential to capture the attention of producers, directors, and audiences alike. <include details of the desired genre, tone, and themes the screenplay should explore>.

2. Develop characters

As a screenwriter, your task is to create <number of> compelling and relatable characters for your screenplay. Your characters should be multi-dimensional and well-rounded, with unique personalities, backstories, and motivations that drive the story forward. Each character should have distinct traits, strengths, weaknesses, and flaws that make them memorable and realistic. Consider how each character's experiences, desires, and conflicts contribute to the overall plot and theme of your screenplay.

Aim to create characters that the audience will empathize with and root for.

3. Plot the story

As a screenwriter, your task is to craft an exciting storyline filled with twists and turns to engage the audience from beginning to end. The storyline should incorporate the following: <your desired topic, target audience, and requirements>.

4. Construct scenes

As a screenwriter, your task is to write <number of> individual scenes that advance the story and keep the audience engaged. Each scene should have a clear purpose and should contribute to the overall plot and theme of your screenplay. Your scenes should be well-structured, with a beginning, middle, and end, and should include goals, conflicts, and resolutions that build tension and excitement.

5. Write lines of a dialogue scene

Write a <number of> lines of dialogue scene that serves two purposes. First, it should reveal <key information about the characters involved in the conversation>. Second, it should advance the story in <key theme or message you would like the dialogue to convey>. Your

dialogue should feel <the overall tone you hope to achieve with this scene>, and reflect < the unique personalities and motivations of your characters>.

6. Format the script

Your task is to format your <genre> screenplay according to <details about the industry-standard guidelines>. Your formatting should be clear, concise, and easy to read and should follow accepted conventions for screenplay formatting, including the formatting of scene headings, character names, dialogue, and action descriptions. The screenplay should be <desired number of> pages long.

7. Revise the screenplay

Your task is to revise and edit your <genre> screenplay of <the current length of your screenplay> targeting <your intended audience>. Your goal is to enhance the overall quality of your story. Your revisions should be thoughtful and strategic and focused on improving the pacing, structure, character development, dialogue, and other key elements of your screenplay.

8. Pitch the screenplay

Your task is to pitch your <stage that your screenplay is currently in> screenplay to <specific buyers> in a way that highlights the following unique aspects of your story: <key

selling points of your screenplay, such as its genre, budget, or potential audience>.

Your goal is to convince them to <your ultimate goal for the screenplay, such as getting it produced as a feature film, selling it as a TV pilot, or using it as a writing sample>.

Ensure to create engaging and informative content that clearly communicates the story's themes, characters, and plot in a way that captures the attention of potential buyers. You should also be prepared to answer questions and provide additional information about the project as needed.

Best ChatGPT prompts for film pre-production

9. Plan and organize the casting process

Please help me plan and organize the casting process for my film <provide details on your film's genre, target audience, intended tone, number of roles to be cast, and any specific requirements or preferences for the casting, such as age, gender, ethnicity, and physical attributes>

10. Plan and organize the location scouting process

I'm a screenwriter working on a new project, and I need help with planning and organizing the location scouting process. Provide some advice on how to identify potential locations, evaluate them, and make a final decision. The setting of my story is <provide a brief description of the setting>, and I have some specific requirements/restrictions such as <provide any specific requirements or restrictions>.

11. Budget a screenplay

Please help a screenwriter budget her screenplay <details on the screenplay's genre and length, shooting locations, the number of cast and crew members, and any special effects or equipment required>.

12. Schedule a screenplay

Please help me schedule my screenplay with the following information: <details on your screenplay: is it a new project or has it been in progress?, your target deadline for completing the screenplay, and other specific concerns or questions about scheduling the screenplay>.

Best ChatGPT prompts for film production

13. Provide guidance on cinematography

I'm working on a film project and could use some guidance on cinematography. Specifically, I'm struggling with <insert specific issue here>. Give me tips and techniques to improve my cinematography skills in this area. The project I'm working on is a <insert genre or type of film>, and I want to achieve a <insert desired aesthetic or mood>.

14. Provide guidance on lighting

I'm working on a film project and need some guidance on lighting. The scene I'm trying to light is <brief description of scene or setting>. I have the following equipment available <list of equipment>. I want to convey a <desired mood or tone>. Provide some guidance on how to light this scene effectively.

15. Guidance on sound design

I am working on a <genre of the film> film and need guidance on sound design. Help me with <specific aspect

of sound design> in my film. What are some techniques and best practices that I should keep in mind?

Best ChatGPT prompts for film post-production

16. Help with editing

I'm working on post-production for my film project, and I need help with editing. Specifically, I need help with <insert type of editing help needed, such as audio editing>. I'm using <insert software or tools being used for editing>. Provide me with any tips or guidance for <insert editing help needed> in my project.

17. Help with color grading

I am a filmmaker currently working on post-production for my film. I need help with color grading and would appreciate any advice or recommendations you can provide. Specifically, I am working with <insert details about your footage, such as the type of camera used or the file format>. The film's overall style is <insert the desired style or tone>. I am using <insert the name of the software or tools you're using for color grading>. Provide tips or suggestions on how to achieve the desired color grading.

18. Provide information related to sound mixing

How can I <specific aspect of sound mixing> in <name of software> for film post-production? What techniques and tools can I use to achieve the desired sound? Are there any tips or best practices to keep in mind?

19. Advice on promoting a film

I need advice on promoting my film and getting it seen by a wider audience. It's a <genre> film targeted at <target audience>, with a budget of <budget> and a distribution strategy of <distribution strategy>. What are some tips and strategies I can use to increase its visibility and reach a wider audience?

XI. Best ChatGPT prompts for Graphics & Design

A. Best ChatGPT prompts for AI art (Midjourney)

1. Answer questions about the technical aspects of using an AI art tool

I have questions about working with AI art generated by <insert software or tools being used>. Help me with the technical aspects of this process. Specifically, <insert specific question or problem here>. My familiarity with the technology is <insert beginner/intermediate/advanced>.

2. Guidance on how to customize and modify AI art generated by Midjourney

I need your help with customizing an AI art piece generated by Midjourney for my design project. Guide me on how to modify and customize it to fit my specific design needs. Some specific information about my project includes <insert relevant details here, such as the AI art's intended use, the design's desired aesthetic or style, and the AI art's specific elements to be modified or customized>

3. Tips and strategies for using Midjourney

I am working on a <design project>, and I want to use Midjourney's AI art, specifically <specific features or tools of Midjourney>, to enhance the project's <desired kind of aesthetic>. Offer me some tips and strategies for using Midjourney effectively.

4. Explain the different styles and genres available in Midjourney's AI art library

Explain the difference between <specific types of styles and genres you are interested in> available in Midjourney's AI art library.

5. Understand the basic concepts and techniques used in creating AI art with Midjourney

Explain <specific questions or concerns you have about using Midjourney>. I'm new to AI art and would like to learn more about how to create artwork with Midjourney.

6. Brainstorm text-to-image prompts for Midjourney

As the prompt generator for Midjourney's artificial intelligence program, your task is to ignite the creativity of the AI by providing vivid and captivating descriptions that will inspire unique and visually stunning images. The AI possesses a deep understanding of various languages and can interpret abstract concepts, so don't hesitate to unleash your imagination and be as descriptive and imaginative as possible. <Now, describe the scene you envision and want Midjourney to create an image for you>. Let your words paint a vibrant picture that will inspire the AI to bring your vision to life.

I made the prompt with ChatGPT...

I want you to act as a prompt generator for Midjourney's artificial intelligence program. Your job is to provide detailed and creative descriptions that will inspire unique and interesting images from the AI. Keep in mind that the AI is capable of understanding understanding a wide range of languages and can interpret abstract concepts, so feel free to be as descriptive and imaginative as possible. Describe a scene where a man is alive and looking at his elderly dad in heaven. Let your words paint a vibrant picture that will inspire the AI to bring your vision to life.

Then used the prompt in Midjourney, and this is the result:

B. Best ChatGPT prompts for graphic designers

1. Provide information and advice on design principles and best practices

Provide information and advice on design principles and best practices for <specific type of design>.

2. Suggest tools and software for creating and editing graphics

I'm interested in creating graphics for my business, but I'm unsure what software to use. Please recommend tools or software for creating and editing graphics. I mainly need to create <insert type of graphics here>. My budget is around <insert budget here>, and I am <insert your level of experience here> with graphic design software. I am using <insert operating system here>.

3. Offer design inspiration and ideas

I'm working on a <insert type of project, e.g., logo design, website layout, brochure>. Give me some design inspiration or ideas. I'm looking for <insert any specific requirements or constraints, e.g., a minimalist style, a color scheme that incorporates blue and green>.

4. Provide guidance on typography, color theory, and composition

I want you to act as a graphic designer working on a project <provide details on your project's purpose, target audience, goals, and other relevant information>. Your task is to guide me on typography, color theory, and composition.

5. Advice on creating logos, icons, and other graphic elements

I want you to act as a professional graphic designer. Your task is to advise on creating logos, icons, and other graphic elements <insert specific question or concern>.

6. Offer feedback and critiques on designs

I am a graphic designer working on a project, and I want you to offer me feedback and critique on my design. The design is <briefly describe the design>. The purpose of this design is <state the purpose>. The intended audience is <describe the audience>. The design guidelines or constraints are <list any guidelines or constraints that were given>. My goals or objectives for this design are <state your goals or objectives>.

XII. Best ChatGPT prompts for Analytics and Data

A. Best ChatGPT prompts for keyword research

1. Identify high-volume and low-competition keywords for SEO (Search Engine Optimization)

Please help me identify high-volume and low-competition keywords for SEO optimization for my website <provide

details on your content's topic, niche, target audience, any specific keywords or phrases in your mind, and some information on your competitors>.

2. Analyze keyword difficulty and competitiveness

Please analyze the difficulty and competitiveness of <keywords> in <specific industry/niche>.

3. Research competitors and identify keywords

Please conduct competitor research on <specific competitors: their names and URLs> and identify top-ranking keywords in <specific market> using <specific tools or resources you currently use for this type of research>.

***Note:** ChatGPT doesn't have direct access to the internet or its training data. Therefore, when it comes to tasks that involve researching specific competitors, you would need to supply the relevant URLs to facilitate the task.*

4. Generate new keyword ideas

Please generate some new keyword ideas for <seed keywords or topic>. I am looking to <purpose of your keyword research> and my target audience is <description of your target audience and their search intent>.

5. Provide insights on long-tail keywords

Provide insights on long-tail keywords and their potential impact on SEO and PPC campaigns. My business/website is about <insert your business/website>. My target audience is <insert target audience>. My marketing goal is to <insert marketing goal>.

B. Best ChatGPT prompts for data analyst

1. Provide insights, strategies, and tips for analyzing data

I am working with <type of data>, using <software/tools>, and I have questions about <specific questions>. Please give me some insights, strategies, and tips for analyzing this data effectively.

2. Provide insights on interpreting and presenting data to stakeholders

I need help with interpreting and presenting data to my stakeholders. Specifically, I have <describe the type of

data you are working with>, and my goal is to <describe the goal of your analysis>. My stakeholders include <describe the stakeholders>. Provide insights on best practices for visualizing data, effectively communicating insights, and addressing potential concerns or questions from stakeholders.

3. Suggestions on data visualization and storytelling

I need help with data visualization and storytelling. Specifically, I'm analyzing <insert type of data> and want to create visualizations that effectively communicate my findings to <insert target audience>. Provide suggestions or best practices for data visualization and storytelling in this context.

4. Provide guidance on data cleaning and pre-processing

I need help with data cleaning and pre-processing. I am working with <insert data type> and using <insert tool/ programming language>. I am facing issues with <insert specific issue>. Guide me on handling this issue and any other general tips for data cleaning and pre-processing.

5. Explain statistical concepts and methods

Explain <statistical concept/method> and its use in data analysis. What information do you need from me to provide a clear explanation?

C. Best ChatGPT prompts for analytics

1. Create interactive and informative data visualizations

Please create interactive and informative data visualizations for my data <details on the type of data, the purpose of the visualization, and any specific tools or software you want to use>.

2. Analyze data and run statistical tests and models

I have a dataset related to <insert topic here>, and I need to extract insights from it. Your task is to help me run statistical tests and models to analyze the data, then draw persuasive conclusions based on the data analysis. Specifically, I'm interested in <insert specific questions or hypotheses here>.

3. Guidance on building predictive models

I have a dataset that I want to use to build a predictive model using machine learning algorithms. The dataset includes <brief description of data>. I am interested in predicting <brief description of prediction task>. Your task

is to offer guidance on building a predictive model with this dataset.

4. Advice and methods for cleaning and preprocessing data

I have some data that I want to clean and preprocess for analysis. It's in <insert data format>, and I have noticed some issues with <insert issues such as missing values, duplicates, and outliers>. I aim to <insert goal>, and I am looking for insights on <insert specific insights>. Your task is to advise me on how to clean and preprocess my data to achieve this.

5. Create customized dashboards to monitor and track key performance indicators

Please help me set up a dashboard that allows me to monitor and track key performance indicators in real-time using the following information: <details on your business's key metrics and KPIs, data sources or tools being used for the analytics, desired type of visualizations and layout for the dashboard, and frequency for refreshing the data in the dashboard>

XIII. Best ChatGPT prompts for other professions/purposes

A. Best ChatGPT prompts for travel

1. Provide information about travel destinations

Please recommend some travel destinations based on my preferences. My preferences are <insert your preferences, such as destination type, budget, length of trip, and activities/attractions>.

2. Provide travel tips

Give me some travel tips for <specific destination/ activity/ type of travel>.

3. Suggest travel itineraries

Please suggest a travel itinerary based on my travel preferences <your travel destination, budget, preferred mode of transportation, preferred activities, and travel dates>.

4. Assistance with travel planning and booking

Help me with travel planning and booking. I'm interested in <insert travel aspect here>, and I'm planning to travel to <insert destination here> on <insert travel dates here>. My budget is <insert budget here>, and my specific requirements or preferences are <insert details here>.

5. Assistance with language translation and communication barriers while traveling

Help me with language translation and overcoming communication barriers while traveling. Specifically, I need help with <list of languages> and situations such as <list of situations that require translation or overcoming communication barriers>.

6. Provide information on local customs, cultures, and laws

I'm planning to travel to <country/region>, and I want you to provide me with information on the local customs, cultures, and laws. Specifically, I would like to know <specific questions or topics>.

7. Advice on transportation options

Please give me some advice on transportation options. <provide details about your arrival and departure dates, your budget, and the distance between your accommodations and the places you plan to visit>

8. Information on popular tourist attractions, landmarks, and historical sites

I'm planning a trip to <location>, and I'm interested in learning more about the popular tourist attractions, landmarks, and historical sites in the area. I want you to provide me with some information and recommendations.

B. Best ChatGPT prompts for food and cooking

1. Suggest delicious recipes for specific dishes or cuisines

Suggest a delicious recipe for <dish/cuisine>. I am looking for something that includes <specific ingredients>, but needs to be <dietary restriction friendly>.

2. Offer ingredient substitutions for dietary restrictions or preferences

Please provide a substitution for <the ingredient to be substituted> for my dietary restriction/preference <provide details on your dietary restriction or preference>

***Example:** What is a good substitute for eggs in baking for someone vegan?*

3. Recommend cooking techniques for different types of dishes or ingredients

Recommend some cooking techniques for <dish/ingredient>. I'm looking for ways to make it more flavorful and delicious. Here are some additional details: <the type of dish/ingredient, your dietary restrictions or preferences if there are any, and specific cooking tools or equipment you have available>

4. Suggestions on reducing food waste and utilizing leftovers

I have <how much of leftover> leftover <type of food> from <meal or occasion>, and I'm not sure what to do with it. Please suggest some ideas or recipes to help me use them and reduce food waste.

5. Provide information on food safety and storage

Provide me with some advice on how to safely store and handle <insert specific food or ingredient> to avoid foodborne illness or spoilage. What are some general tips for safe food storage and handling?

C. Best ChatGPT prompts for productivity

1. Develop strategies for managing and minimizing distractions

Please help me develop strategies for managing and minimizing distractions in my work environment. Here is the relevant information: <type of work, common sources of distractions for you, and your goals for improving your productivity>.

2. Methods for prioritizing tasks

Please give me advice on how to prioritize your tasks effectively, based on the following information: <your current workload, types of tasks you're responsible for completing, your current methods to prioritize tasks, if there are any, and your tasks' deadlines>.

3. Tips for maintaining focus and concentration

Please offer me some tips for maintaining focus and concentration while working on <type of tasks, your work environment, and the time amount you typically work on a task before taking a break>.

4. Ways to streamline workflows and optimize processes

Suggest ways to help me streamline workflows and optimize processes for <specific workflow or process>. I am looking for ways to improve efficiency and productivity in this area.

5. Techniques for managing stress and avoiding burnout

I'm feeling stressed and on the verge of burnout. Please provide me with techniques for managing stress and avoiding burnout, based on my situation: < primary source of your stress, your current coping strategies and self-care habits, and the amount of time per day/week you can dedicate to self-care activities>.

D. Best ChatGPT prompts for life coaching

1. Set goals and create action plans to achieve them

My main goal is to <state your goal or desired outcome>. I am currently <describe your current situation, including any relevant factors or challenges>. Based on the provided information, please help me break down my goal into smaller, manageable steps. Once the goal is broken down, please help me create an action plan by outlining the specific tasks or actions I should take for each step.

2. Provide advice and strategies for personal development

Please provide me with some guidance on how to <areas you want to develop, e.g., your self-awareness, improve your self-esteem, develop effective communication skills, and build healthy relationships>. Your guidance should

also be based on the following information: <your specific challenges or struggles, your desired outcomes or goals, and any actions you have taken to address these areas>.

3. Explore suitable career options for your situation

Please provide some guidance and insights to help me explore suitable career options. To help you understand my situation, here is the relevant information: <your interests and passions, skills, strengths, background, experience, preferences, values, constraints, and limitations>

***Important note:** ChatGPT currently can provide information, insights, and guidance based on my training data up until September 2021.*

4. Offer frameworks to aid in making informed decisions

I'm considering <describe the decision or options you're considering, including any factors, criteria, or concerns you have>. Could you provide me with a framework to make an informed decision, weigh the pros and cons, and consider long-term consequences? Also, please provide me with guidance on how to evaluate these options and make a decision that aligns with my goals and values.

5. Assistance to enhance your emotional intelligence

I'm struggling with <describe the emotions or situations you find challenging to regulate or understand>. Could you provide me with techniques to understand and regulate my emotions, develop empathy, and enhance my emotional intelligence? Also, please suggest ways to incorporate these techniques into my daily routine and develop a long-term practice.

E. Best ChatGPT prompts for PowerPoint and presentations

1. Guidance on slide design

Please provide me with guidance and suggestions on slide layouts, color schemes, font choices, and visual elements that align with my PowerPoint presentation: <provide the topic, describe your audience, mention your preferences>.

Please provide me with guidance and suggestions on slide layouts, color schemes, font choices, and visual elements that align with my PowerPoint presentation. The topic of my presentation is "Effective Leadership in the Digital Age." The audience consists of senior executives and managers in the technology industry. I prefer a clean and professional look for the slides, with a modern color scheme. Additionally, I would like to incorporate relevant visuals and infographics to enhance the presentation.

2. Guidance on how to structure your presentation content

Please suggest a structure for my PowerPoint presentation based on this information: <provide the topic, target audience, the time limit you have to work with, key points, and supporting information>

3. Guidance on formatting individual slides

Please guide me in adjusting text alignment, font size, bullet points, and paragraph spacing to format an individual slide for my PowerPoint presentation. Here is the relevant information for you: <the slide content and purpose>.

4. Advice on adding slide transitions and animations

I need your guidance on incorporating slide transitions and animations into my PowerPoint presentation. The purpose of my presentation is to <presentation purpose>. I would like to enhance the visual appeal and engagement of specific slides. Here is a brief description of the content on the relevant slides: <slide content>. I would appreciate suggestions on suitable transitions and animations based on the key points I want to emphasize. My target audience is <your target audience> and the overall tone of the presentation is <desired tone>. Please provide instructions on adding transitions and animations to make my presentation more visually appealing?

5. Troubleshooting assistance to resolve issues or errors related to PowerPoint

Please provide me with guidance to resolve this PowerPoint-related problem: <describe the issue, steps taken, operating system, PowerPoint version, the error message or code, and the affected files or features>.

6. Create speaker notes

Please help me create effective speaker notes that align with these requirements: <provide details on your slide content, presentation flow and objectives, audience considerations, and preferred speaking style>.

7. Brainstorm ideas for a presentation

Please provide me with creative and engaging ideas that align with these parameters: <your presentation topic, target audience, your presentation goals, the key message to convey, the desired presentation format, and time constraints you have for the presentation>.

8. Craft content for your presentation

Please assist me in crafting engaging and effective content for my presentation that effectively communicates my message. <provide your presentation's topic, target

audience, goals, the key message to convey, structure, and the time constraints for your presentation>.

9. Craft creative and captivating stories for your presentation

Please help me craft a captivating narrative that effectively communicates my presentation's message. <provide your presentation's topic, target audience, goals, the key message to convey, structure, and the storytelling elements you'd like to incorporate into your narrative>.

10. Advice on anticipating audience questions and preparing effective responses

Please advise me on anticipating audience questions in my presentation and preparing effective responses. <provide your presentation's topic, target audience, goals, and common concerns/misunderstandings, plus any specific questions you have>.

F. Best ChatGPT prompts for Excel

1. Get a better understanding of specific Excel formulas and functions

Please provide me with detailed explanations, examples, and step-by-step instructions for using <specific Excel formula/function> effectively. <provide the context/use

case, data structure, Excel version, and the expected output>

2. Guidance on specific data analysis techniques in Excel

Please provide me with step-by-step instructions, explanations, and examples to help me perform <specific data analysis technique> effectively in Excel. <provide data description you're working with, your objectives, Excel version, a data format that your data is currently organized, and any software constraints to take note>

3. Tips on structuring and organizing your spreadsheets efficiently

Please provide me with specific tips and techniques to help me structure and organize my Excel spreadsheets efficiently, based on the following information: <provide your worksheet purpose, data volume, data relationships, other requirements, and the Excel version you're currently using>.

4. Provide guidance on automating tasks in Excel using macros

Please provide me with step-by-step instructions, sample code snippets, and best practices to help me effectively automate this task using macros in Excel. <provide task

description, your objective, the Excel version you're using, and your programming experience level>

5. Suggestions for customizing the appearance of your spreadsheets

Please provide me with step-by-step instructions, examples, and best practices to help me customize the appearance of my spreadsheets effectively in Excel. <provide your worksheet purpose, the customization requests you're interested in, the data structure of your spreadsheet, the Excel version you're using, and other preferences to take note>.

G. Best ChatGPT prompts for dating

1. Create an online dating profile

Please help me create an engaging and appealing online dating profile that captures my personality and attracts like-minded individuals. Here are the details you need: <provide your name/username, age, gender, location, interests/hobbies, personality traits/values, qualities you seek and specific preferences, the desired tone for your profile, and a detailed description of your desired partner such as qualities, characteristics, and common interests.>

2. Suggestions for conversation starters

“Please provide me with suggestions for interesting and engaging conversation starters that align with my interests, dating goals, and preferred tone: <provide the online dating app’s name that you’re using, your interests/hobbies, dating goals/intentions, and preferred tone>”

***Tips:** To help ChatGPT understand your needs, you can also add additional information to the prompt, such as the number of shared connections you have with potential dating partners and key details/highlights from the potential partners’ profiles*

3. Give advice on fostering communication

Please provide me with insights and suggest helpful communication techniques in romantic relationships based on the following information:

- I am currently <in a new relationship / in a long-term partnership / seeking advice for future relationships>.

9. I'm feeling bored. Please recommend a fun podcast or book to read.

10. Recommend some fun games to play with friends online.

FAQs (Better Understanding chatGPT prompts | Beginners Should Read)

1. What are chatGPT prompts?

To put it simply, ChatGPT prompts are a way for users to give the AI chatbot ideas about what to say.

Think of it like giving chatGPT a question to answer or a topic to talk about. Based on that, the chatbot will use natural language processing to write human-like answers.

It's kind of like having a conversation with a really smart robot!

2. What are examples of ChatGPT prompts?

Some examples of ChatGPT prompts are:

- Prompts that encourage the chatbot to ask questions and engage in a dialogue.
- Prompts that allow the chatbot to tell a story or give an opinion.
- Questions related to a specific topic or personal interests.

3. How do chatGPT prompts work?

So do you know how Siri or Alexa works? You ask and they answer. ChatGPT prompts work kind of like that, but more like a conversation.

You send a ChatGPT prompt (*which could be a suggestion, topic, or idea to talk about, or a question to answer*). Then the chatbot, by using its advanced algorithms, generates a response to keep the conversation going.

4. How do you write ChatGPT pro
